# 1.Introduction

This wireframe document provides a visual representation of the key user interface components and layout for the eCommerce MERN project. Wireframes are meant to depict the structural elements and flow of the application's screens.

## 2. Landing Page

- Header with Logo and Navigation Links
- Hero Section with Featured Products
- Categories Section
- Footer with Contact and Social Links

### 3. Product Listings

Product Grid with Images, Names, and Prices

Filter Sidebar (Categories, Price Range, etc.)

Pagination for Long Product Lists

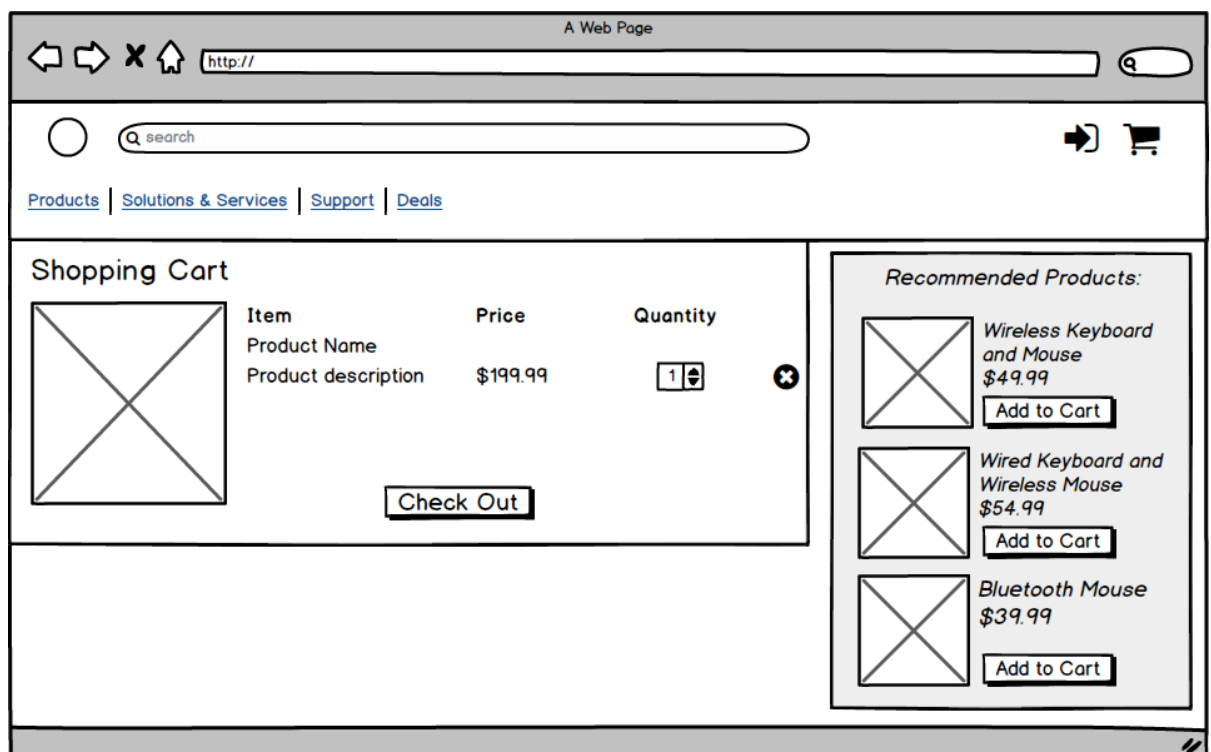

### 4. Product Detail Page

Product Image

Product Name, Description, and Price

Add to Cart Button

Product Specifications and Reviews Tabs

## 5. Cart and Checkout

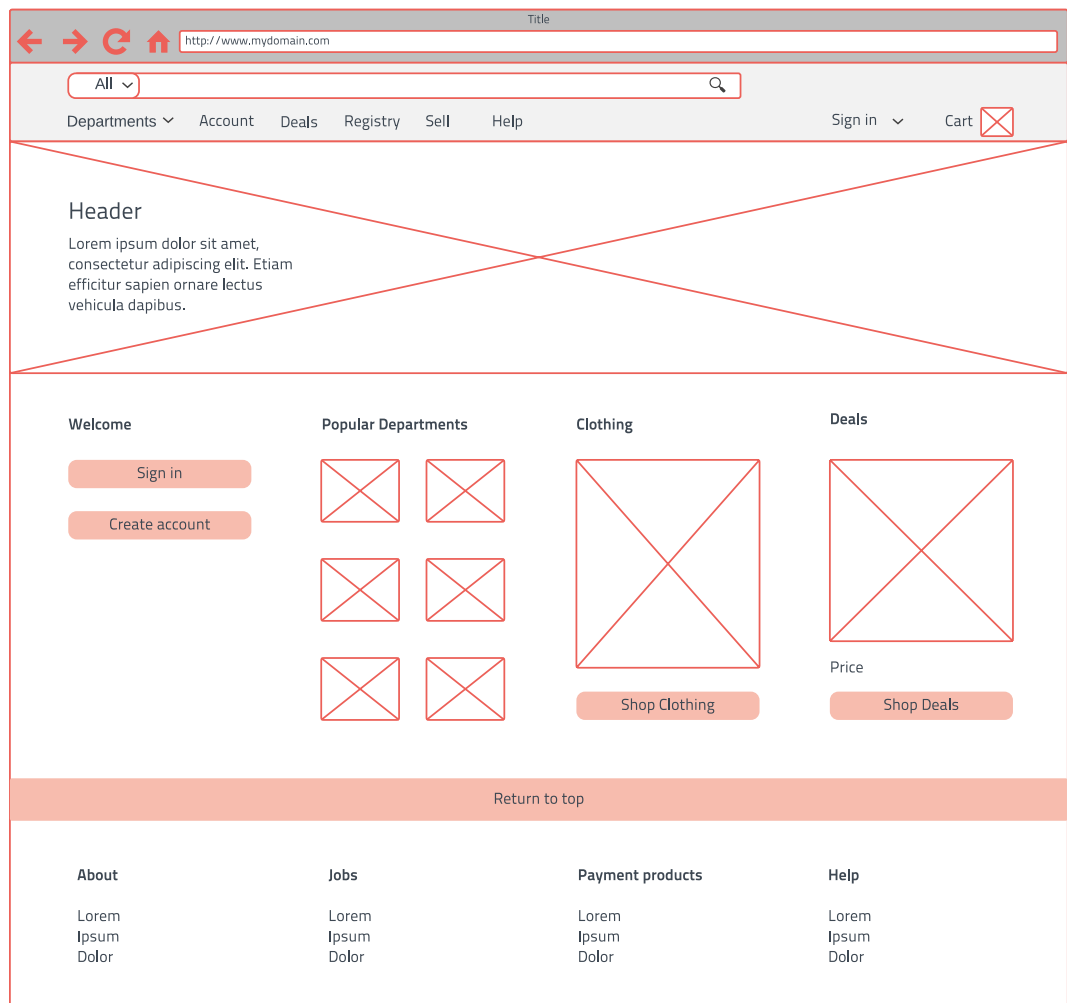

Cart Preview with Product List and Total Amount  
Quantity Adjustment and Remove Buttons  
Proceed to Checkout Button

## 6. User Profile

Profile Information (Name, Email)  
Order History and Status  
Password Change Option

## 7. Admin Dashboard

### Manage Products (Add, Edit, Delete)

## 8. Conclusion

This wireframe document serves as a visual reference for the layout and structure of the eCommerce MERN project's user interface. It outlines the main screens, components, and user flows to guide the design and development process.

Wireframes are a starting point and may evolve during the design and development phases based on feedback and requirements. Detailed design and UI/UX considerations will be addressed in the actual design implementation.
